## How to print this PDF at 100 percent (actual size)

When you need to print a document precisely at its actual size, but the output that emerges from your home printer appears too large or too small, check your PDF application for settings that force its output at more or less than actual size.

This is what you need to do for printing without resizing:

- Open your PDF document
- Select 'Print...' in the File menu
- Within the 'Print' settings window, set the scale to 100%
- and press 'Print' to print at 100% of the original PDF.
